CORE COMPETENCIES

OFFENSIVE SECURITY TESTING

- Network Penetration Testing
- Wireless Penetration Testing
- Application Security Testing
- Social Engineering Testing
- Physical Penetration Testing

ASSESSMENTS & ADVISORY

- Network Vulnerability Assessments
- Cybersecurity Risk Assessments
- Info Security Policy Consulting
- Remediation Planning & Prioritization
- NIST CSF 2.0 Assessments

TRAINING & WORKFORCE READINESS

- Cybersecurity Awareness Training
- Technical Cybersecurity Training
- Security Best Practices Training
- Secure Software Development
- Fundamentals of IT Security

WHO WE ARE

Affinity IT Security Services provides cybersecurity testing, assessment, training, and advisory support to identify exploitable cyber risk, validate security controls, prioritize remediation, and improve mission assurance. Founded in 1993 as a software training firm, Affinity IT has provided offensive security testing and advisory services since 2007.

PAST PERFORMANCE & EXPERIENCE

- ✓ Reduced Municipal Governments' exploitable vulnerability footprint by 70% with one engagement, lowering estimated cyber risk by 40% and helping the organizations prioritize remediation, reduce exposure, and avoid potential incident-response and downtime costs.
- ✓ Clients span Municipal, Financial Services, Healthcare, Insurance, Telecom, and transportation sectors.

COMPANY DATA

UEI: FG41NC789VY6

CAGE: 66EA9

DUNS: 830498684

GSA MAS: 47QTCA21D00EE

SINs: 54151S, 54151HACS, 611420

Business Type: SBA Certified Small Business

NAICS: 541511, 541512, 541513, 541519, 541690, 541990, 611699, 611420

PSC/FSC: 7J, DJ, D310, U0

UNSPSC: 81111801, 80101507, 86101601

SOC 2 Certified

ACQUISITION & CERTIFICATIONS

- GSA MAS — 47QTCA21D00EE
- HACS SIN 54151HACS | Training SIN 611420

DIFFERENTIATORS

- ✓ Apply decades of AT&T Bell Laboratories' experience to provide a combination of deep application and network penetration testing with comprehensive vulnerability assessment capabilities unmatched in the industry.
- ✓ Practical, cost-effective recommendations focused on actionable risk reduction — findings are prioritized by exploitability, not just severity.
- ✓ Agile small-business model that adapts to urgent requirements, tight timelines, and stakeholder schedules.
- ✓ Translate technical findings into clear executive summaries and remediation roadmaps for both technical and leadership audiences.
- ✓ Proprietary reporting platform with a custom-built reporting engine, rapidly identifies top 25 vulnerabilities along with new vulnerabilities from subsequent testing.
